

Living in regional South Australia , Pinnaroo districts a postal real Australian bank would swing my family's votes. Why ? Sometimes I have to travel over 130km for 3 major banks to make a cash deposit or direct deposit to a customer/ industry suppliers. Another I have to travel 200km. Then there is their uncertainty they will be open or if with drawing money they have it on hand. It's almost criminal the banks have with drawn from regional center's denial of basic money for trade and commerce. If an ATM goes down or runs out of cash it has a crippling effect on the community. With a nation's bank at the post offices it would solve these problems
