

A National Bank,the essential tool to serve the National Physical Economy!

Attention- Chairperson,and committee team,

Dear Team,

Please be assured, many Australian citizens are patently aware, your appointment of investigation into regional banking efficacy,and integrity statutes, is one of/or? the most important assignment invested upon you,particularly so,at this juncture- of where the unbridled(LAW UNTO THEMSELVES),private/corporate international economic forces are at play!!

Generally- the masses are treated like mushrooms!,but, many among them, choose to embrace,and cultivate, their Divinely gifted infinite creative ability,and are passionate for the knowledge of TRUTH.And right now, the depth,and breadth of this knowledge is literally terrifying! No doubt, you are bound to rigid terms of reference within this assignment, that will deliver according to a particular template?We all have extended family, that we all should care for their general welfare also!(a most beautiful Divine gift enshrined within Us),I strongly urge for you to engage with your Divine Spirit also, during these deliberations, as this could be the only/last opportunity to re-introduce some genuine,equitable,essential and, "HONEST", banking services to every Australian citizen.Anything lesser,clearly is failure!

A Federally enshrined Australia Post Bank- is the elementary option to address the very serious issue of shrinking,and declining, essential full banking services, for our nation to function effectively, and sustainably, in a globally dependent operations arena today.Australia Post is beautifully structured,and it's physical presence is perfect to deliver excellence in all banking needs, to the entire nation; Distant,regional,and remote environs of our country is where "ALL" the new- tangible physical principals wealth begins it's journey-period,opposing debate>futile.

Our cities are where the masses live,and work, but,it never was, never will be, the principal engine room balance wheel of a truly- new physical principals wealth creation economy,Cities have a role to play, unfortunately their sheer magnitude in size,and population,is demonstrably inefficient,(Serious study of "City Limits",sobering revelations indeed!).. have been exposed in spades,just how vulnerable they can become, particularly so, during severe crisis, i.e, Corona virus pandemic.The bulk of the "Monetary Economic Wealth", (read- "hoard"), will be locked within the sophisticated security vault systems within these cities, Sadly, the most profound number of casualties of Corona 19,-sick, diseased,and/or deceased persons, are within these large metropolis.

Money, currency, bullion, locked in a vault,or numbers in a computer,it's physical capacity contribution to the general welfare, is zero. The regions are desperate for essential infrastructure, to house, educate, nourish, and harmonize many more people to participate in the real wealth creation platforms--DECENTRALIZATION from the cities to the regions is assignment #2 desperately waiting in the wings for your attention also; A National Australia Post peoples bank could provide the seed capital also, for establishment of a national bank with broad based infrastructure,and manufacture credit issue powers, to seriously value add to our massive broad based natural resource assets is the fundamental catalyst to ignite a beautiful new paradigm that will shine a Divine light upon Australia for the whole world to assimilate!

Kind Regards,

Noel G Stratford.
